Simple Interest – Assignment

Assignment Text

These problems are from section 6.4 of the textbook.

Answer the following problems with the following numbers: 11 - 14, 19 - 22, 35, 37.

For reference, the text of the problems are duplicated below.

- 11. Principal = \$13,800, annual interest rate = 2.55%, compounded quarterly, for 18 years
- 12. Principal = \$150,000, annual interest rate = 2.95%, compounded quarterly, for 30 years
- 13. Principal = \$3,500, annual interest rate = 2.9%, compounded monthly, for 7 years
- 14. Principal = \$1,500, annual interest rate = 3.23%, compounded monthly, for 30 years.
- 19. Future value = \$1,500,000, annual interest rate = 4.81%, compounded quarterly, for 35 years
- 20. Future value = \$750,000, annual interest rate = 3.95%, compounded quarterly, for 10 years
- 21. Future value = \$600,000, annual interest rate = 3.79%, compounded monthly, for 17 years
- 22. Future value = \$800,000, annual interest rate = 4.23%, compounded monthly, for 35 years
- 35. Daria invests \$2,500 in a CD that yields 3.5% compounded quarterly for 5 years. How much is the CD worth after those 5 years?
- 37. Georgita is shopping for an account to invest her money in. She wants the account to grow to \$400,000 in 30 years. She finds an account that earns 4.75% compounded monthly. How much does she need to deposit to reach her goal?

Assignment Key

- 11. \$21,806.58
- 12. \$362,269.29
- 13. \$4,286.70
- 14. \$3,947.82
- 19. \$281,395.75
- 20. \$506,239.96
- 21. \$315,337.97
- 22. \$182,493.58
